

Shamir Spark™ 4W

ADVANCED DIGITAL MEASUREMENT AI TECHNOLOGY

Add a Spark to Every
Buying Experience

SPARK |  shamir

DIGITAL TRANSFORMATION IS CHANGING THE WAY WE LIVE OUR LIVES

Shamir Spark™ 4W will change the way you work

Shamir Spark™ 4W stands out as a standalone advanced electro-optic measurement system. Based on sophisticated 3D stereo vision technology and artificial intelligence (AI) elements, you get an automatic measurement of your patient's PD in just one click.

Simply seat your patient in front of Shamir Spark™ 4W and click!

That's all there is to it. Now that you've acquired the pupillary distance (PD), you can mark the remaining points later.

Thanks to its unique features, Shamir Spark™ 4W sees the patient's pupils clearly with clear lenses and even through sunglasses, as well as different coatings.

Shamir Spark™ 4W makes the measurement process efficient and reliable, enabling exact measurements with the actual chosen frame and lens color options.

NO STRINGS ATTACHED

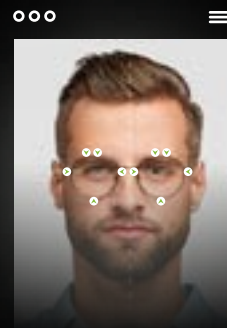

Shamir Spark™ 4W is a standalone device that operates on Wi-Fi, you can –

Place your compact Shamir Spark™ 4W device anywhere in your store for optimal comfort and convenience

Use our handy app, **Shamir Spark™ Remote**, on any mobile device to take a picture in one click

You can mark the point of interests later on your tablet, laptop or PC, once the patient has left the store

SHAMIR SPARK™ 4W TECHNOLOGY IS DESIGNED TO DELIVER **ACCURATE MEASUREMENTS**

Its camera system was specially designed by Shamir for uncompromising ophthalmic fitting measurement.

24
MP

Sharp images and optimal viewing angles

Six high resolution camera sensors combine to deliver 24-megapixel ultrasharp images

Auto pupil detection

State-of-the-art AI vision algorithm detects and processes 192 facial landmarks

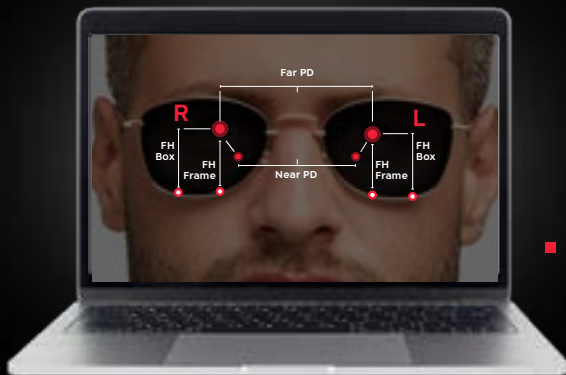

Precision viewing

Two active near-infrared cameras allow an unobstructed view of the patient's pupils

Crisp eyewear images

Four additional color cameras take crisp images of any eyewear

After you've taken the PD, you can mark the points of interest to complement all the required parameters on your tablet, laptop, or PC when your patient has left the store and submit your order online

GIVE YOUR PATIENTS A WOW MOMENT

Shamir Spark™ 4W provides an upmarket touch-free experience to your patients, preserving their personal space while providing the most professional examination available today.

Thanks to Shamir Spark™ 4W's measurement accuracy, lenses are precisely fitted to each individual patient, minimizing non-adaptation and vision correction.

Shamir Spark™ 4W widens the variety of frames that you can offer, leading to more sales opportunities and more satisfied patients!

IT'S SLEEK, SMART, AND MODERN

Takes up minimal space & easily integrates into your workspace

Connects via Wi-Fi & allows any mobile device to be used for measurement

Carry out measuring and ordering in the same session, reducing risk and delays

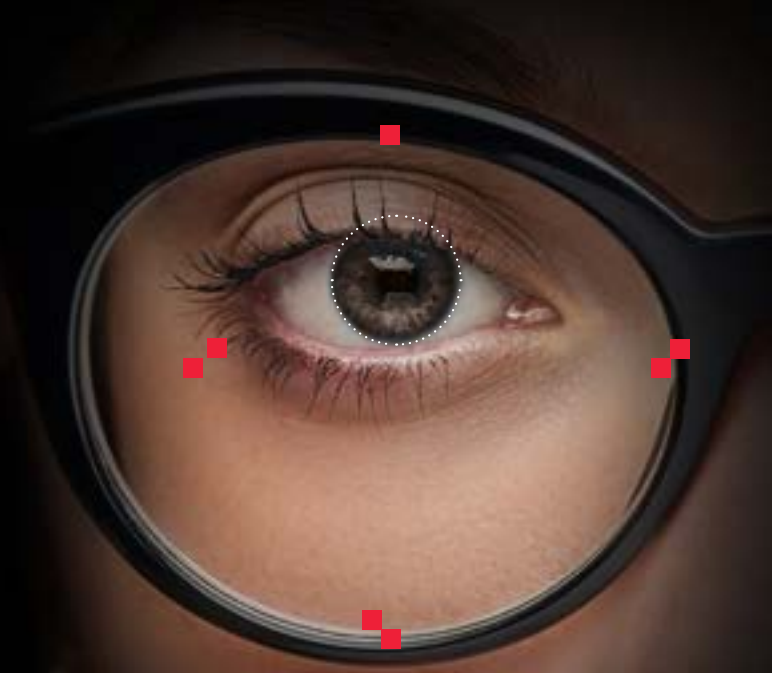

Stay up to date with ongoing upgrades to the latest features and functions

REVOLUTIONIZE YOUR PRACTICE AND REV UP YOUR PERFORMANCE

Offer your patients cutting-edge technology that improves their experience – and yours too.

Shamir Spark™ 4W can make your measurement process more efficient by enabling your team of ECPs to work in parallel – while one is taking a photo, the other can complete the measurement.

IT'S EASY, ACCURATE, AND EFFICIENT.
